

AI_Memory_Bank_Store_Description

AI Memory Bank — Your Intelligent Second Brain for the AI Era

Stop losing brilliant ideas, hard-won solutions, and important information to the void. AI Memory Bank is the only Chrome extension that lets you save anything from the web, then instantly recall and inject that knowledge into ChatGPT, Claude, Gemini, and any other AI assistant — right where you need it.

No more copy-pasting. No more re-explaining context to every new chat. Your memories travel with you.

🌟 WHAT YOU CAN DO

📌 SAVE IN SECONDS — THREE WAYS TO CAPTURE

- **Partial Save (Drag & Right-Click)**
Highlight any text on any webpage, right-click, and tap “Save to Memory Bank.” AI Memory Bank automatically extracts the key information and stores it to your personal knowledge base. Perfect for articles, documentation, forum threads, and code snippets.
- **Single Save (Smart Page Capture)**
Click the extension icon and hit “Save This Page.” The extension intelligently captures up to 10,000 characters from the current page, sends it through AI summarization, and saves the distilled insights to your vector database. One click — done.
- **Full Scan (Deep Conversation Archive) ★ Starter Pack & LITE+**
Unlock the full power of AI Memory Bank. Full Scan captures the entire content of a page — no character limit — breaks it into intelligent chunks, runs each through our AI extraction pipeline in parallel, and stores everything as rich, searchable memories. Ideal for archiving long ChatGPT threads, research documents, and lengthy articles you never want to lose.

🔍 SEARCH YOUR MEMORIES — POWERED BY VECTOR AI

Forget keyword search. AI Memory Bank uses vector similarity search (the same technology behind modern AI) to find memories based on meaning, not just matching words.

Type a question or concept, and the engine surfaces the most relevant memories you’ve ever saved — even if you used completely different words when you saved them.

⚡ /m COMMAND — INJECT KNOWLEDGE INTO ANY AI CHAT

This is the magic. While chatting with ChatGPT, Claude, Gemini, or any AI assistant:

1. Type /m [your question] in the chat input

2. AI Memory Bank searches your personal knowledge base in real time
3. Your relevant saved memories are automatically injected into the chat as context
4. The AI responds with full awareness of YOUR personal knowledge

Example: You once saved a detailed troubleshooting guide for a Spring Boot error. Weeks later, chatting with ChatGPT about a similar issue, just type /m Spring Boot transaction error — and your past solution is instantly surfaced and injected.

This is personal RAG (Retrieval-Augmented Generation) — but built for everyday users, not engineers.

SYNC — TAKE YOUR MEMORIES EVERYWHERE

Switching AI models? Moving between devices? AI Memory Bank's Sync feature exports your entire memory database in a clean, structured format — so you can seamlessly carry your knowledge into any new AI conversation, on any platform.

WORKSPACES — ORGANIZE YOUR KNOWLEDGE

Keep your memories organized with Workspaces. Create separate spaces for Work, Personal Projects, Research, Language Learning, or anything else. Your memories stay categorized, searchable, and neatly separated.

FREE TO START — UPGRADE WHEN YOU'RE READY

AI Memory Bank is free to use, with a generous daily credit allowance.

- FREE → \$0 (30 credits/day · 1 Workspace)
 - STARTER → \$0.99 One-time (Lifetime Full Scan Unlock + 100 Bonus Credits)
 - LITE → \$2.99/mo (100 credits/day · 2 Workspaces)
 - PRO → \$4.99/mo (500 credits/day · 4 Workspaces)
 - PREMIUM → \$11.90/mo (2,000 credits/day · Unlimited Workspaces)

Credits refresh every day. No subscription required to get started.

YOUR DATA, YOUR CONTROL

- Login securely with your Google account — no passwords to remember
 - Your saved memories are stored in your personal, isolated knowledge base
 - We never sell your data or use your memories to train AI models
 - All AI processing uses industry-standard OpenAI infrastructure
-

PERFECT FOR

- Developers & Engineers — Save error solutions, code patterns, and Stack Overflow answers. Recall them instantly while debugging with AI.
 - Researchers & Students — Build a personal research database. Let AI Memory Bank connect the dots across papers, articles, and notes.
 - Content Creators & Writers — Never lose a good idea. Save inspiration, references, and drafts, then pull them into your AI writing sessions.

- Professionals & Knowledge Workers — Archive meeting summaries, client notes, and important emails. Search them in seconds.
 - Power Users of ChatGPT, Claude & Gemini — Give your AI a long-term memory it was never designed to have.
-
